

DOCUMENTATION FOR THE *WE ARE PEOPLE CONFERENCE* WEBSITE (YOUTHRISE 2025 PROJECT)

Website Designed By:

- **Organization:** Goodzic Sound
- **Lead Developer:** Goodness Onwuanaku

ADMIN DASHBOARD LOGIN DETAILS:

USERNAME: YOUTHRISE

PASSWORD: WEAREPEOPLECONFERENCE2025

Please note username and password are case sensitive, use as you see above.

Project Overview

This project involved the design and development of a web service for the *We Are People Conference* organized under the YouthRise 2025 initiative.

Project Deliverables

1. Design and deployment of a fully responsive website (optimized for both mobile and desktop).
2. Development of an intuitive and engaging user interface (UI/UX).
3. Creation of key pages, including:
 - Home
 - About the Conference
 - Speakers' Profiles
 - Structure of the Event
 - Registration (for Participants, Exhibitors, and Volunteers)
 - Sponsorship Information Page
 - Programme Information Page
 - Blog
 - Gallery Page (as shown in the shared sample)
 - Sponsors' Logo Footer and other best practices.
4. Implementation of SEO and integration of analytics tracking tools.
5. Basic cybersecurity and data protection compliance.

6. Post-launch support, including testing and training for the admin team.
 7. User-friendly administrator interface for managing all website features.
 8. Optimized front-end design and development for a seamless public user experience.
 9. Search functionality across news/blogs, publications/guidance, and events (by year).
 10. Newsletter sign-up functionality for the latest news and updates.
 11. Integration of a secure and user-friendly payment system for registrations, donations, and other transactions (payment gateway).
-

Notes

All deliverables were successfully implemented except for the integration of the secure payment system. This feature was excluded due to a change in requirements from YouthRise.

FRONTEND IMPLEMENTATION FOR *WE ARE PEOPLE* CONFERENCE WEBSITE

Overview

The frontend of the *We Are People Conference* site is the public-facing interface through which users interact with all content: pages, images, forms, navigation, and interactive elements. It is designed to be responsive, intuitive, and performant, reflecting the brand identity and mission of the conference.

Key Features & Components

1. Responsive Design / Mobile-First Approach
 - The layout adapts fluidly between desktop, tablet, and mobile breakpoints.
 - Navigation, text blocks, images, and buttons scale and reflow to maintain usability on small screens.
 - Touch-friendly UI components (buttons, dropdowns) ensure a seamless experience on mobile devices.
2. Consistent Navigation & Header / Footer
 - The site has a persistent navigation bar with links to main sections: Home, About, Programme, Speakers, Gallery, Blog, Register, etc. (wearepeopleconference.org)
 - Footer includes conference contact info, newsletter signup, and sponsor logos, maintaining brand visibility at all pages.
3. Hero / Banner Sections & Countdown
 - The homepage features a prominent hero section announcing conference dates and a “Register” call to action. (wearepeopleconference.org)

- A countdown timer is included (or placeholder) to build anticipation — this helps with engagement and urgency.

4. Dynamic Content Sections

- Speakers, partners, and sponsor logos are displayed as grids of images, each linking to detailed pages or external resources. (wearepeopleconference.org)
- Blog listings, gallery, programme pages are dynamically rendered from backend data so updates reflect immediately on frontend.

5. Gallery / Lightbox Integration

- The gallery page shows thumbnails of images; clicking opens a lightbox (fancy preview) view with navigation controls (next/prev/exit).
- Captions for images are shown only when available.

6. Forms & Interactions

- Registration forms (Participant, Exhibitor, Volunteer) are embedded, styled consistently, validate user inputs, and provide feedback.
- Newsletter sign-up / latest news form in footer or across pages.
- Search or filtering functionality (for blog/news/events) to let users find content by year, category, or type.

7. SEO & Metadata

- Each page includes metadata (title, description, social tags) for better search engine indexability.
- Proper use of headings (h1, h2, etc.), alt attributes on images (for accessibility), and semantic HTML markup.

8. Performance & Optimization

- Images are optimized for web (compressed, appropriate formats) so load times stay low.
- Lazy-loading techniques for images and media assets where applicable.
- Minification and bundling of CSS / JavaScript to reduce HTTP requests and size.

9. Cross-Browser Compatibility & Accessibility

- Tested to work across major modern browsers (Chrome, Firefox, Edge, Safari).
- Accessibility considerations: keyboard navigation, screen-reader friendly markup, ARIA labels where necessary.

10. Error Handling & Fallbacks

- Graceful handling of missing or empty data (e.g. if an image has no caption, it simply doesn't render that caption).

11. Future-Ready

- Modular architecture so components (e.g. registration, gallery, blog) can be extended or replaced.
- Capability to integrate payment or donation features in the future if the requirement is restored.

Sample Frontend Flow (User Journey)

- Visitor lands on Home page, sees hero banner with dates, a countdown, and “Register” button.
- Scrolling down, they see sections like “About the Conference,” “Our Speakers,” and a section for partners/sponsors.
- They click “Speakers” → see a list/grid of speaker cards → click on a card → see detailed speaker profile.
- They navigate to “Gallery” → view images in a grid → click one → opens lightbox with Next / Prev / close options.
- They go to “Register” → fill form, submit, get confirmation or error.
- They check “Blog” / “News” pages and use search or filter to find relevant content.
- Footer is always visible with contact info and newsletter subscription.

DOCUMENTATION FOR THE ADMIN DASHBOARD (WE ARE PEOPLE CONFERENCE WEBSITE)

Overview

The **Admin Dashboard** is a custom-built backend interface designed for managing the *We Are People Conference* website. It enables authorized administrators to manage content, monitor activity, and keep the site up to date. Built with **Django**, the dashboard integrates seamlessly with the project's database and front-end, providing a user-friendly way to oversee and update conference-related information.

Technology Stack

- **Backend Framework:** Django
- **Frontend Framework:** Bootstrap 5.3.7 (via CDN)
- **Templating Engine:** Django Template Language (DTL)
- **Custom Styling:** admincss.css (for cards, overlays, and animation effects)

- **Icons & Graphics:** Inline SVGs for lightweight and scalable vector graphics
-

Features

The dashboard is designed around a **card-based layout** with intuitive navigation. Each card represents a functional area of the website and links to relevant management pages.

Key Functional Areas

1. Conference Date Management

- Allows administrators to set and update official event dates.
- Ensures accurate synchronization across the frontend (e.g., Hero section and countdown timers,).

2. Conference Venue Management

- Provides an interface for adding/updating venue details.
- Updates reflect directly on the "Hero Section" of the website.

3. Speakers Management

- Administrators can create, edit, or remove speaker profiles.
- Profiles include speaker name, biography, and photo.

Note: Kindly Upload Images of same sizes (aspect ratio) or slight size different (aspect ratio) Recommendation (2440px x 1080px)

4. Registrations Management

- Centralized dashboard for viewing and managing participant, exhibitor, and volunteer registrations.
- Supports CSV export.

5. Impact Stories

- Centralized dashboard for viewing and managing Impact stories.
- Supports CSV export.

6. Exhibitions Management

- Centralized dashboard for viewing and managing Exhibitors.
- Supports CSV export.

7. Sponsors Management

- Centralized dashboard for viewing and managing Sponsors.

- Supports CSV export.

8. Sponsors Logo Management

- Upload and manage sponsor logos. (Remove backgrounds of images before upload)
- Sponsors logo appears in the “Our Partners” section of the Homepage of the website.

9. Sponsors Package

- Create and manage sponsors package that would be displayed in sponsors registration form.
- Can't accept prices over NGN 50,000,000

10. Programme Upload

- Upload the conference program in pdf format.
- The uploaded programs will be listed below the form kindly scroll down to view. In order not to have more than one programme, please ensure to upload only one programme or delete a programme before uploading a new programme.

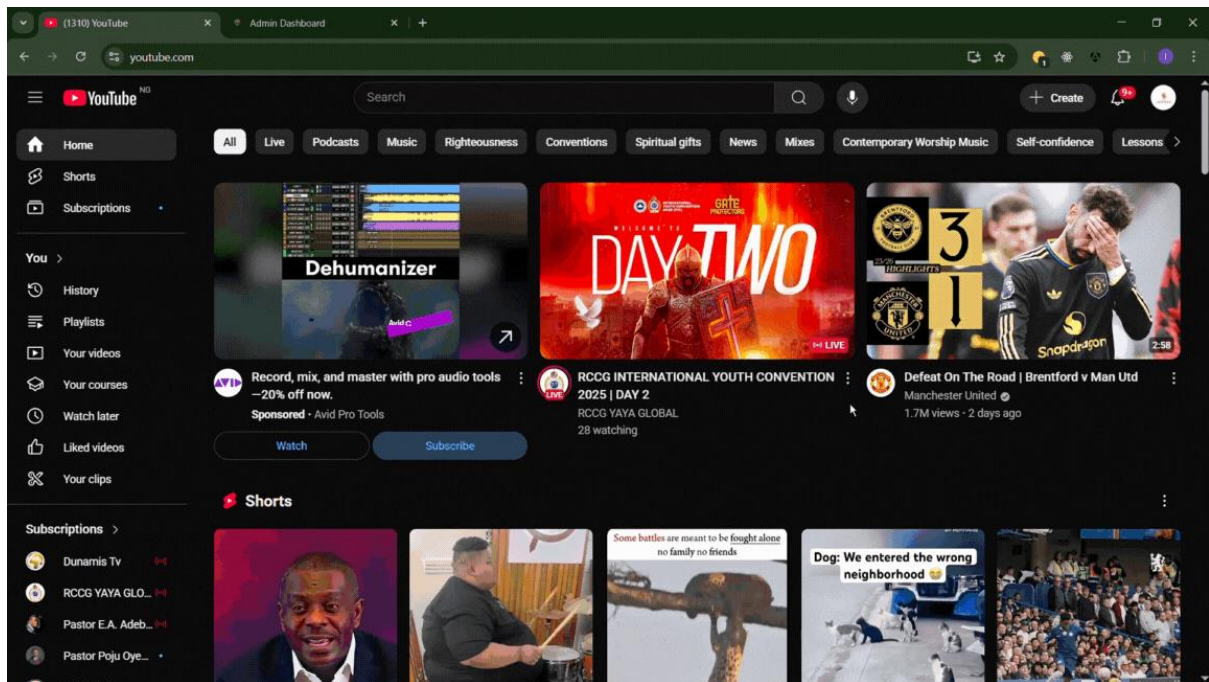

11. Streaming Link

- Kindly Upload the Embeddable streaming link as copied from YouTube in order to enable the streaming option on the website.
Further clarification would be provided in the training session.

12. Previous Days Video

- There are Two categories in this section which are: Day 1 and Day 2.
- To upload Day 1 Video, Select Day 1 from the dropdown menu and kindly paste the embeddable link copied from YouTube.
- To upload Day 2 Video, Select Day 2 from the dropdown menu and hence do the same.
- Embeddable link should look like this:
<https://www.youtube.com/embed/FyA5odC4oUg?si=iISSbGyRrhQVWTsy>

**BELOW IS A GIF ILLUSTRATING HOW TO GET THE
EMBEDDABLE YOUTUBE VIDEO LINK**

HOW TO GET THE EMBEDDABLE YOUTUBE LINK

13. Gallery Update

- Upload conference images into gallery.
- You can only upload one after the other.
- Add a title to the image before upload. The title will display as the image caption in the fancy previewer on the website.

14. Blog Post

- Blog page contains a Title, 4 paragraphs which includes, Paragraph 1, Paragraph 2, Paragraph 3, Paragraph 4 and a Keynote section.
- The max number of images it can take = 2 (Max = 2 Images).
- You can edit and delete blog through this section.

15. Contact Messages

- Centralized dashboard for viewing contact messages.

16. Newsletter Registrations

- Centralized dashboard for viewing Newsletter Registrations.
- Supports CSV export.

Conclusion

The **Admin Dashboard** provides a centralized, intuitive, and responsive environment for managing all aspects of the *We Are People Conference* website. It simplifies content management, reduces the risk of errors, and ensures that the site remains current and professional.
